

T-Head Bolts

Bolts & Cap Screws

†Length of a T-head bolt is measured from the underhead bearing surface to the extreme end of the bolt.

T-HEAD BOLTS										ANSI/ASME B18.5

Description	A low or medium carbon steel, externally threaded mechanical device 1/4" diameter or larger, with a rectangular head with a rounded top surface and a flat bearing surface.
Applications/Advantages	Used in the machine tool and water works industries
Material	Bolts shall be made from a carbon steel which conforms to the following chemical composition requirements-- Carbon: 0.55% maximum; Phosphorus: 0.048% maximum; Sulfur: 0.058% maximum
Hardness	Rockwell B70 - 100
Tensile Strength	60,000 psi. minimum
Yield Strength	36,000 psi. minimum
Elongation	18% minimum
Reduction of Area	35% minimum
Plating	See Appendix-A for plating information.
